

HERO11 Black Mini

251798

Get incredible HERO11 Black video performance in a smaller, lighter, simpler design. HERO11 Black Mini's size makes it more comfortable to wear when capturing point-of-view footage while its new dual mounting fingers boost your body and helmet mounting options. As waterproof as ever and even more rugged, it's ready for any adventure. Simply press the Shutter button to power up and record with our best settings. Its new image sensor ensures you'll get stunning 5.3K video with silky-smooth HyperSmooth 5.0 video stabilisation.

PRODUCT DETAILS

The Power of HERO11 Black. Only Smaller + Lighter.

Get the same high-performance 5.6K60 video and HyperSmooth 5.0 video stabilisation of HERO11 Black in a smaller and lighter design. HERO11 Black Mini's size makes it ideal for capturing amazing point-of-view footage using helmet and body mounts. It can be worn comfortably without getting in your way while mountain biking, skiing, skating and more.

Unprecedented Mounting Versatility

HERO11 Black Mini is the first GoPro with two sets of folding mounting fingers—giving it more mounting options than any other GoPro ever made. Use the new rear fingers whenever you want a more subtle low-profile mount. It's perfect for streamlined helmet mounting while still giving you the flexibility to adjust your camera angle on the fly. Use the bottom mounting fingers with grips, tripods and gear mounts.

Extra Rugged + Waterproof

Taking legendary GoPro durability to the next level, HERO11 Black Mini is entirely wrapped in a tough outer shell. This makes it even more impervious to the elements and anything else you can throw at it. It easily rips through mud, snow, dirt and more. Just rinse it off and get back out there. Just as waterproof as ever (to depths of 10 m), it also has a scratch-resistant lens cover that adds even more protection and can be easily replaced if needed.

1-Button Simplicity with Easy + Pro Controls

HERO11 Black Mini makes capturing amazing footage of your adventure incredibly easy. Just point and shoot. Using the Easy Controls, all you have to do is press the Shutter button to power up your camera and start recording stunning 5.3K video—our highest resolution. Switch over to Pro Controls if you want to adjust resolutions, frame rates, digital lenses and image quality settings to set up shots exactly the way you want them.

Capture. Charge. Get a Highlight Video Automatically.¹

Simply plug in your GoPro when connected to your home Wi-Fi. While it's charging, your footage is automatically uploaded to the cloud and used to make a highlight video complete with beat-synced music and effects. Videos are automatically sent to your phone and ready to share.

New Image Sensor

HERO11 Black Mini's powerful new image sensor delivers the most expansive field of view ever on a HERO camera out of the box. This gives you an extra-large canvas for your creativity by capturing more of the sky and horizon in every shot. Simply use the GoPro Quik app to zoom in, crop your shots, adjust aspect ratios and more while keeping the rich textures and sharpness of your footage.

Unbelievable Image Quality

With 5.3K video that gives you 91% more resolution than 4K and an incredible 665% more than 1080p, HERO11 Black Mini captures the action with crisp detail and cinematic image quality. Plus, you can record 2.7K video at 240 frames per second and play it back in super-fluid 8x slo-mo to catch details that can't be seen at normal speed. A water-repelling lens cover even helps eliminate lens flare and other artefacts to make your photos and videos even more stunning.

High-Res Video + Frame Grabs

HERO11 Black Mini's amazing 5.3K footage gives you more than incredible high-resolution videos. It lets you capture high-quality photos up to 24.7 MP from your videos with the GoPro Quik app or other editing software. All it takes is a tap when you see a great shot in your video. The app grabs the exact frame you want and saves it as a photo that's ready to share and post.

Emmy Award-Winning HyperSmooth 5.0 Video Stabilisation

HyperSmooth has never been better. And now it's won a huge award for its insanely smooth footage—a 2021 Emmy for In-Camera Sensor and Software Stabilisation. HyperSmooth 5.0 raises the bar even higher with Horizon Lock, improved stabilisation for 4:3 aspect ratio footage thanks to our new image sensor, and AutoBoost for maximum stabilisation with minimal image cropping. Bike, skate, ski, chase your kids through the park or get some amazing pet POV shots—even the shakiest footage comes out silky smooth.

Horizon Lock

Give your videos the look of professional productions by keeping the horizon steady, straight and smooth when using the Linear + Horizon Lock digital lens. HERO11 Black Mini delivers Horizon Lock, which keeps your footage steady even if your camera rotates a full 360° during capture.² Combined with HyperSmooth, Horizon Lock delivers super-smooth footage that looks perfectly straight when you want it to. You won't need a gimbal or stabilisation software for pro-quality results.

Long-Lasting Enduro Battery Technology

Using advanced GoPro Enduro battery technology, the integrated HERO11 Black mini battery makes the most of its 1,500 mAh of power by improving cold-weather performance while extending recording times in moderate temperatures. It lets you power through ski, snowboard and other winter shots at lower temperatures than ever. It also charges faster so you'll spend less time waiting and more time chasing your adventure.

Over 1 Billion Colours

HERO11 Black Mini lets you choose between capturing 8-bit or 10-bit colour. Capable of displaying over 1 billion colours, 10-bit colour delivers enhanced colour depth, smoother gradations and more realism for your videos.

New HyperView Digital Lens

This GoPro-exclusive lens takes the 8:7 aspect ratio footage served up by our new image sensor and delivers it as a wide-angle 16:9 shot. The result is ultra-immersive video that amps up action-oriented point-of-view footage by capturing more of you and your surroundings.

Ultra-Versatile 8:7 Aspect Ratio

The 8:7 aspect ratio captures more of the scene in each shot. The added height makes it perfect for creating extra-tall 9:16 vertical shots or any other size you need for any social media platform, with less cropping. You can also zoom in on the best sections of your videos to create high-resolution punchouts of the action while cropping out the rest using the GoPro Quik app or other editing software.

New Night Effects

HERO11 Black Mini features three new Time Lapse modes that let you get creative after dark. Star Trails uses the Earth's rotation and the stars to capture beautiful light trails across the night sky. Light Painting lets you create brilliant brush stroke effects with moving light. Vehicle Light Trails uses night-time traffic to record stunning light trail footage.

Live Streaming

Use HERO11 Black Mini to live stream your next activity in full HD 1080p video as you vlog with buttery HyperSmooth video stabilisation and sharp resolution.

Easy Transferring + Unlimited Cloud Backup¹

Super easy, super fast. Transferring photos and videos from your cloud-connected camera to your phone is simple and versatile, with your choice of effortless wireless upload via the Quik app or a lightning-fast wired connection via USB.³ There's also unlimited cloud storage with hassle-free auto upload. Just plug in your camera when connected to your home Wi-Fi and the camera does the rest. You can also use your SD card to transfer your content to a computer for backup to the cloud.

Key Camera Specs
