

Aiper Scuba SE Cordless Pool cleaning robot

253119

Elevate your pool cleaning with the Scuba SE: a sleek, hydrodynamic device offering superior performance and energy efficiency - without any cords. Its advanced water flushing system swiftly drains 80% of water in 15 seconds, while audio alerts keep you informed of its current status. Enjoy powerful suction with a 2L filter box for thorough cleaning. Experience effortless operation with one-click activation and auto-parking features.

PRODUCT DETAILS

The Hydrodynamic Design improves performance

Thanks to the hydrodynamic design of the Scuba SE, the device travels through the pool as it moves across the pool floor, picking up dirt and debris. Thanks to the design, the Scuba SE consumes less energy for the drive and utilises this energy for its cleaning functions.

Quick Drain

For optimum mobility, the Scuba SE has developed a newly improved, sophisticated water flushing system that can drain 80% of the stored water in just 15 seconds.

Audio Warning System

A great cleaning experience without questions or confusion. Thanks to our easy-to-understand audio alerts, you'll always be in the know when it comes to pool cleaning. Scuba SE owners always know the status of their device, no matter what.

Cleaning Performance

The dual drive motors generate up to 83 LPM of suction and filtration power. The Scuba SE is equipped with a two-litre filter box to store all the debris collected by your pool cleaner, even during the toughest cleaning jobs.

Activation with One Click

Aiper has made every effort to make cleaning completely effortless. And that's exactly what the Scuba SE offers with its elegant, simple one-click activation function. Simply switch on the device, place it in your pool and watch the cleaning process run perfectly before your eyes.

Auto-Parking

The Scuba SE combines simplicity and convenience thanks to its automatic parking function. When the device has completed the cleaning process or the battery is almost empty, the Scuba SE automatically parks near the edge of the pool so that you can easily get it out without getting wet.

Cordless

Avoid hassle, tangled cables and tripping hazards with modern cordless devices. While some robotic pool cleaners still have plugs, making storage difficult, the Scuba SE is completely cordless, making it lighter and easier to transport and store.

What's in the box

- Scuba SE
- Charger
- User Manual
- Retrieval Hook
- 2x Brushes
