Momcozy Smart Baby Thermometer

256985

The Momcozy Smart Baby Thermometer offers continuous, high-precision temperature tracking designed to give parents complete peace of mind without disturbing their baby's sleep. Featuring skin-safe 3M hypoallergenic patches, real-time app trend tracking, and an impressive 180-hour battery life, it delivers reliable, discreet health monitoring both at home and on the go.

PRODUCT DETAILS

Features:

- **High-Precision Sensor & Reliable Temperature Monitoring** - Equipped with a built-in high-performance sensor and compensation algorithm, this wearable baby thermometer delivers instant readings with high accuracy. By tracking temperature changes, it helps you identify your baby's needs with greater confidence and provides reliable insights for parenting decisions.
- **Unfelt Wearing & Undisturbed Sleep for Baby** - Designed with 3M hypoallergenic material compliant with ISO 10993 skin safety standards, the baby thermometer sticker is gentle on delicate skin. It monitors temperature discreetly while your baby sleeps soundly. For optimal comfort and accuracy, clean and dry the armpit before use and replace the disposable sticker every 8 hours.
- **Continuous Monitoring & Temperature Trend Tracking** - The wearable smart baby thermometer continuously tracks temperature while the Momcozy App is active and connected. It automatically generates easy-to-read temperature trend charts and allows parents to manually record related symptoms for more comprehensive monitoring.
- **180-Hour Ultra-Long Battery Life & Portable Readings Anytime, Anywhere** - This compact all-in-one kit is designed for modern parenting. The sealed storage case ensures portability, hygiene, and safety, while the 180-hour battery life provides reliable monitoring at home or on the go.
- **Local Data Storage Security & Multi-User Management** - Temperature data is securely stored locally on the device via Bluetooth connection. The Momcozy app supports multiple child profiles, allowing families to manage temperature records for multiple children with a single device. Simply attach the patch under the arm for stable and accurate readings close to core body temperature.
