Therabody Theragun Vibration Plus Attachment – Vibration Therapy

Colour

PRODUCT DETAILS

Vibration Plus Attachment

The Vibration Plus Attachment helps ease muscle and joint pain with three science-backed vibration speeds that stimulate muscles and boost circulation, making it perfect for effective pre and post-workout recovery.

Targeted vibration for tender joints and muscles

When percussive therapy feels too intense, vibration therapy is your go-to for gentle, effective relief of joint pain and tension — perfect for sensitive areas pre and post-workout.

How does vibration therapy work?

Vibration therapy gently targets the surface of your muscles to improve circulation, relieve tension and reduce pain. It also helps increase blood flow and oxygen to the tissues, making it a great choice for sensitive areas like joints or sore muscles.

Vibration Therapy

Three vibration speeds: Low, Medium and High

Product Specifications
