

AWOL Vision Daylight ambient light reduction (ALR) screen, 100"

252592

AWOL Vision's Daylight ALR Screen elevates your living room entertainment with greater contrast levels, enhanced brightness, and 85% light rejection. Enjoy vivid colors and clear images even in bright environments, thanks to the advanced Fresnel lens technology. With a wide 90° viewing angle, you and your loved ones can all immerse in a captivating cinematic experience. Available as 100" or 120".

PRODUCT DETAILS

Size 120", **100"**

Higher Contrast Level

The Daylight ALR screen's Fresnel lens structure and 8 layers optical structure filters enhance brightness and contrast while countering the washout effect of ambient light, making it perfect for living rooms with a bright light environment. It provides 75 times greater contrast levels than standard matte white screens for premium color fidelity.

85% Ceiling & Sides light rejection

With Fresnel Lens Technology, the screen can absorb 85% of overhead and sides ambient light, direct the incident light towards the audience to increase image quality and contrast.

1.1dB Peak Gain

With 1.1dB Peak Gain, the Daylight Screen has 50% higher contrast than similar ALR Fresnel screens, making the color more vivid under ambient light.

Wide viewing angle

With a 90° wide viewing angle you, your family and friends can enjoy bright, crisp and clear images from a variety of places in your living room.
