

Silk´n Silky Straight

256754

Achieve sleek, shiny results on all hair types with SilkyStraight. Features floating titanium plates, 12 temperature settings, and a fast 15-second heat-up.

PRODUKTSPECIFIKATION

Time to meet our newest hair straightener designed to style your hair with significantly less damage! The SilkyStraight uses advanced infrared technology and releases millions of negative ions for superior hair protection, less frizz, and reduced styling time. Flexible floating titanium plates ensure flawless results on all hair types, while a dynamic LED display lets you effortlessly monitor your styling session.

Why the SilkyStraight Changes Everything:

- Advanced Infrared Technology: Heats the hair safely from the inside out while the plates work on the exterior. This allows you to style at lower temperatures, reducing styling time and minimizing structural hair damage.
- Titanium Floating Plates: Premium silver titanium plates heat up fast and distribute warmth perfectly evenly. Mounted on flexible springs, they automatically tilt to maintain the ideal tension required to both straighten and curl without snagging.
- 20 Million Negative Ions: A high-capacity ionic generator produces over 20,000,000 ions/cm³ to seal the hair cuticles, lock in natural oils, and provide absolute static control against frizz and flyaways.
- 12 Smart Temperature Settings: Features an extensive temperature range from 120°C up to 230°C, making it safe and effective for every unique hair texture, from ultra-thin and damaged to very thick or coarse hair.
- Rapid 15-Second Heat Up: Reaches 180°C in just 15 seconds, allowing you to achieve sleek, glossy, salon-standard results in no time at all.

Smart Features & Premium Convenience:
The SilkyStraight is packed with user-friendly upgrades, including a smart memory function that remembers your last temperature setting, a plate lock function to prevent accidental changes while styling, and a 45-minute automatic safety shut-off. For ultimate styling freedom, it features an extra-long 3-meter swivel cable.

Travel-Friendly Design:
Engineered with an ultra-lightweight body and dual voltage capabilities for safe worldwide use, the SilkyStraight is the perfect travel companion. It also comes complete with a premium, heat-resistant travel pouch that protects your surfaces during use and stores your device safely on the go.
