

ESOTERIC

7N-S10000II MEXCEL (BI-WIRE) 2.0Mx2

246347

Braided speaker cables with spade connectors, for bi-wiring.

PRODUKTSPECIFIKATION

Overview

There are dense braided conductors made of flat-shape MEXCEL braided conductors with a uniform MEDIS (electro-deposited insulation) coating applied to the four cores with polyolefin-elastomer strings wound around and interspaced to achieve flat transmission characteristics up to the gigahertz zone. Cables are also shielded with noise-reducing aluminum + carbon Kevlar composite sleeves at the hot/cold branch. Termination is silver + rhodium plating, and beryllium copper alloy 50 banana plugs or 6N Cu spade connectors can be specified when ordering.
